

## Tips to Get Ready for Wildfire Season

Dear [REDACTED]

Wildfire season has arrived - are you and your family prepared? Because you live in an area where wildfires can occur, we want to help you be protected.

Reducing the risk of damage to your home or vehicles is to prepare before the fire starts. Here are some steps you can take to prepare:

- Create a 5-foot noncombustible buffer around your home and deck.
- Check and maintain your roof and gutters.
- Install ember-resistant vents.
- Ensure a 6-inch vertical clearance on exterior walls.
- Clear and maintain decks, porches, yards and structures from 5 to 30 feet.

Access more tools, checklists, and read advice to help you stay safe during a wildfire by visiting our [Natural Disaster Preparation Site](#).

We hope that a wildfire never gets to your home or vehicle, but if it does, we always stand ready to help. You can file a claim online or using our mobile app if you have experienced a loss.

Thank you,  
United Services Automobile Association
